6.1、办公模块静态结构

mobile_officing/entry/src/main/ets/pages/work/work.ets

```
@Component
export struct Work {
  @Builder buildTop() {
    Row() {
      Text("我的办公")
        .fontSize('30sp')
        .fontColor(Color.white)
        .fontWeight(800)
    }
    Row() {
      Column() {
        Text("8℃")
          .fontColor(Color.white)
          .fontWeight(800)
        Text("12月8日")
          .fontColor(Color.white)
          .margin({ top: 5 })
      }

      Image($rawfile("work/weather.png"))
        .height(50)
        .width(50)
    }
  }
  .padding({ left: 20, right: 20, bottom: 10 })
  .height('100vp')
  .width('100%')
  .alignItems(VerticalAlign.Bottom)
  .justifyContent(FlexAlign.SpaceBetween)
  .borderColor({ bottom: '#6a6cb2' })
  .borderWidth({ bottom: 1 })
  .backgroundColor('#4749a1')
}

@Builder buildTip() {
  Row() {
    Column() {
      Text('待审批')
        .fontSize(16)
        .fontColor('#8888cd')
      Text('15')
        .fontSize(26)
        .fontColor(Color.white)
        .fontWeight(800)
        .margin({ top: 15 })
    }

    Column() {
      Text('会议提醒')
        .fontSize(16)
        .fontColor('#8888cd')
      Text('2')
    }
  }
}
```

```

        .fontSize(26)
        .fontColor(Color.white)
        .fontWeight(800)
        .margin({ top: 15 })
    }

    Column() {
        Text('周报')
            .fontSize(16)
            .fontColor('#8888cd')
        Text('1')
            .fontSize(26)
            .fontColor(Color.white)
            .fontWeight(800)
            .margin({ top: 15 })
    }

    Column() {
        Text('工作汇报')
            .fontSize(16)
            .fontColor('#8888cd')
        Text('5')
            .fontSize(26)
            .fontColor(Color.white)
            .fontWeight(800)
            .margin({ top: 15 })
    }
}

.padding({
    top: 30
})
.alignItems(VerticalAlign.Top)
.justifyContent(FlexAlign.SpaceEvenly)
.backgroundColor('#4749a1')
.height(200)
.width('100%')
}

// 构建App每一项
@Builder buildAppItem(image: ResourceStr, text: string) {
    Column() {
        Image(image)
            .width(50)
            .height(50)
        Text(text)
            .margin({
                top: 10
            })
    }
    .width('25%')
    .margin({
        bottom: 20
    })
}
}

```

// 构建App容器（使用Grid组件）

```

@Builder buildAppContainer() {
  Grid() {
    GridItem() {
      this.buildAppItem($rawfile("work/process.png"), "请假申请")
    }

    GridItem() {
      this.buildAppItem($rawfile("work/clock.png"), "考勤打卡")
    }

    GridItem() {
      this.buildAppItem($rawfile("work/report.png"), "汇报")
    }

    GridItem() {
      this.buildAppItem($rawfile("work/approve.png"), "OA审批")
    }

    GridItem() {
      this.buildAppItem($rawfile("work/card.png"), "补卡申请")
    }

    GridItem() {
      this.buildAppItem($rawfile("work/salary.png"), "工资单")
    }

    GridItem() {
      this.buildAppItem($rawfile("work/notice.png"), "公司公告")
    }

    GridItem() {
      this.buildAppItem($rawfile("work/rule.png"), "规章制度")
    }
  }
  .rowsGap(20)
  .columnsTemplate("1fr 1fr 1fr 1fr")
  .padding({
    top: 20,
    bottom: 20
  })
}

```

// 构建App容器（使用Flex组件）

```

@Builder buildAppContainer2() {
  Flex({ wrap: FlexWrap.Wrap, alignContent: FlexAlign.SpaceBetween }) {
    this.buildAppItem($rawfile("work/process.png"), "请假申请")
    this.buildAppItem($rawfile("work/clock.png"), "考勤打卡")
    this.buildAppItem($rawfile("work/report.png"), "汇报")
    this.buildAppItem($rawfile("work/approve.png"), "OA审批")
    this.buildAppItem($rawfile("work/card.png"), "补卡申请")
    this.buildAppItem($rawfile("work/salary.png"), "工资单")
    this.buildAppItem($rawfile("work/notice.png"), "公司公告")
    this.buildAppItem($rawfile("work/rule.png"), "规章制度")
  }
  .padding({
    left: 15,

```

```

        right: 15,
        top: 20,
        bottom: 20
    })
}

@Builder buildAppManagement() {
    Column() {
        Row() {
            Row() {
                Image($rawfile("work/menu.png"))
                    .width(26)
                    .height(26)
                Text("应用管理")
                    .margin({ left: 5 })
                    .fontSize(20)
                    .fontWeight(600)
                    .fontColor('#101010')
            }

            Row() {
                Text("自定义")
                    .fontColor('#7f6666')
                    .fontSize(16)
                Image($rawfile("my/arrow_right.png"))
                    .width(20)
                    .height(20)
            }
        }
        .padding({ left: 10, right: 10 })
        .justifyContent(FlexAlign.SpaceBetween)
        .height(60)
        .width('100%')
        .borderColor({ bottom: '#efefef' })
        .borderWidth({ bottom: 1 })

        // this.buildAppContainer()
        this.buildAppContainer2()
    }
    .height(280)
    .width('94%')
    .backgroundColor(Color.white)
    .borderRadius(10)
    .offset({ y: -180 })
}

@Builder buildApplyFor() {
    Column() {
        Row() {
            Row() {
                Image($rawfile("work/badge.png"))
                    .width(22)
                    .height(22)
                Text("我的申请")
                    .margin({ left: 5 })
                    .fontSize(20)
            }
        }
    }
}

```

```

        .fontWeight(600)
        .fontColor('#101010')
    }

    Row() {
        Text("更多")
        .fontColor('#7f6666')
        .fontSize(16)
        Image($rawfile("my/arrow_right.png"))
        .width(20)
        .height(20)
    }
}

.padding({ left: 10, right: 10 })
.justifyContent(FlexAlign.SpaceBetween)
.height(60)
.width('100%')

Row() {
    Row() {
        Text()
        .width(20)
        .height(20)
        .borderRadius(10)
        .backgroundColor('#4749a1')
        .margin({ top: 33 })
    }
    .alignItems(VerticalAlign.Top)
    .justifyContent(FlexAlign.Center)
    .height('100%')
    .width(40)

    Column() {
        Text("请假申请")
        .fontSize(20)
        .fontWeight(600)
        Text("2020/11/23 至 2020/11/24 共2天")
        Row() {

            Text("待审批").fontColor('#ff935d')
        }
        .width('100%')
        .justifyContent(FlexAlign.SpaceBetween)
        .padding({ right: 20 })
    }
    .alignItems(HorizontalAlign.Start)
    .justifyContent(FlexAlign.SpaceEvenly)
    .layoutWeight(1)
    .height(130)
}

.width('100%')
.height(160)
.borderColor({ top: '#efefef' })
.borderWidth({ top: 1 })

Row() {

```

```

    Row() {
      Text()
        .width(20)
        .height(20)
        .borderRadius(10)
        .backgroundColor('#4749a1')
        .margin({ top: 33 })
    }
    .alignItems(VerticalAlign.Top)
    .justifyContent(FlexAlign.Center)
    .height('100%')
    .width(40)

    Column() {
      Text("请假申请")
        .fontSize(20)
        .fontWeight(600)
      Text("2020/11/23 至 2020/11/24 共2天")
      Row() {
        Text('申请时间: 2020-11-22 16:50')
        Text("正在审批中")
          .fontColor('#53cbae')
      }
      .width('100%')
      .justifyContent(FlexAlign.SpaceBetween)
      .padding({ right: 20 })
    }
    .alignItems(HorizontalAlign.Start)
    .justifyContent(FlexAlign.SpaceEvenly)
    .layoutWeight(1)
    .height(130)
  }
  .width('100%')
  .height(160)
  .borderColor({ top: '#efefef' })
  .borderWidth({ top: 1 })
}
.margin({
  top: -65,
  bottom: 15
})
.width('94%')
.backgroundColor(Color.white)
.borderRadius(10)
}

build() {
  Stack({ alignContent: Alignment.TopStart }) {
    // 构建头部
    this.buildTop()
    List() {
      // 提示信息
      this.buildTip()
      // 应用管理
      this.buildAppManagement()
      // 我的申请
    }
  }
}

```

```

        this.buildApplyFor()
    }
    .alignListItem(ListItemAlign.Center)
    .width('100%')
    .height('100%')
    .padding({
        top: 100
    })
}
.width('100%')
.height('100%')
.backgroundColor('#f5f5f5')
}
}

```

6.2、办公模块中我的申请

6.2.1、返回数据类型文件编写

mobile_officing/entry/src/main/ets/types/Process.ets

```

export interface Process {
    _id: string
    approve_number: string // 审批编号
    department: string // 所在部门
    type_id: string // 类型 1: 人事管理 2: 行政事务 3: 财务类 4: 业务相关
    type: string // 请假类型
    reason: string // 请假事由/加班原因
    begin_date: string // 请假/加班开始日期
    end_date: string // 请假/加班结束日期
    begin_time: string // 请假/加班开始时间
    end_time: string // 请假/加班结束时间
    days: string // 请假/加班天数
    hours: string // 请假/加班小时
    initiator: string // 发起人
    department_leader: string // 部门领导
    personnel_department: string // 人事部
    cc_persons: string[] // 抄送人
    approve_status: number // 审批状态 1: 待审批 2: 正在审批中 3: 审批通过 4: 拒绝
    status: number // 状态 1: 启动 0: 禁用
    created_at: string
    updated_at: string
}

```

6.2.2、API 接口编写

mobile_officing/entry/src/main/ets/api/Process.ets

```

import { request } from '../utils/Request'
import { Process } from '../types/Process'

// 分页获取我的申请列表
/**
 * type_id: 0: 全部 1: 人事管理 2: 行政事务 3: 财务类 4: 业务相关

```

```

*/
export const getProcessList = (extraData: {
  type_id: number
  page: number
  pageSize: number
}) => {
  return request<{
    total: number
    items: Process[]
  >({
    url: `process/list?
type_id=${extraData.type_id}&page=${extraData.page}&pageSize=${extraData.pageSize}
`)
  })
}

```

6.2.3、办公模块获取数据

```

import router from '@ohos.router'
import { getProcessList } from '../api/Process'
import { Process } from '../types/Process'

@Component
export struct Work {
  @State processList: Process[] = []

  async getProcessListData() {
    const res = await getProcessList({ type_id: 0, page: 1, pageSize: 2 })
    this.processList = res.data.items
  }

  aboutToAppear() {
    this.getProcessListData()
  }
}

```

6.2.4、申请项子组件封装

mobile_officing/entry/src/main/ets/components/ApplyForItem.ets

```

import router from '@ohos.router'
import { applyForStatus, applyForStatusColor } from '../utils/ApplyForUtil'

@Observed
class MyProcess {
  _id: string = ''
  approve_number: string = '' // 审批编号
  department: string = '' // 所在部门
  type_id: string = '' // 类型 1: 人事管理 2: 行政事务 3: 财务类 4: 业务相关
  type: string = '' // 请假类型
  reason: string = '' // 请假事由/加班原因
  begin_date: string = '' // 请假/加班开始日期
  end_date: string = '' // 请假/加班结束日期
  begin_time: string = '' // 请假/加班开始时间

```

```

end_time: string = '' // 请假/加班结束时间
days: string = '' // 请假/加班天数
hours: string = '' // 请假/加班小时
initiator: string = '' // 发起人
department_leader: string = '' // 部门领导
personnel_department: string = '' // 人事部
cc_persons: string[] = [] // 抄送人
approve_status: number = 0 // 审批状态 1: 待审批 2、正在审批中 3、审批通过 4: 拒绝
status: number = 1 // 状态 1: 启动 0: 禁用
created_at: string = ''
updated_at: string = ''
}

```

@Component

```

export struct ApplyForItem {
  @ObjectLink process: MyProcess

  build() {
    Row() {
      Row() {
        Text()
          .width(20)
          .height(20)
          .borderRadius(10)
          .backgroundColor('#4749a1')
          .margin({ top: 33 })
      }
      .alignItems(VerticalAlign.Top)
      .justifyContent(FlexAlign.Center)
      .height('100%')
      .width(40)

      Column() {
        Text(this.process.type)
          .fontSize(20)
          .fontWeight(600)
        Text(`${this.process.begin_date.replace("-", "/")} 至
${this.process.end_date.replace("-", "/")} 共${this.process.days}天`)
        Row() {
          Text(`申请时间: ${this.process.created_at}`)
          Text(applyForStatus(this.process.approve_status))
            .fontColor(applyForStatusColor(this.process.approve_status))
        }
        .width('100%')
        .justifyContent(FlexAlign.SpaceBetween)
        .padding({ right: 20 })
      }
      .alignItems(HorizontalAlign.Start)
      .justifyContent(FlexAlign.SpaceEvenly)
      .layoutWeight(1)
      .height(130)
    }
    .onClick(() => {
      router.pushUrl({
        url: "pages/work/ApplyForDetail/ApplyForDetail",
        params: this.process
      })
    })
  }
}

```

```

    })
  })
  .width('100%')
  .height(160)
  .borderColor({ top: '#efefef' })
  .borderWidth({ top: 1 })
}
}

```

:::warning

封装子组件时，如果要给子组件传递的是对象类型数据，要使用 [@ObjectLink](#) 和 [@Observed](#)

...

6.2.5、申请项工具类

mobile_officing/entry/src/main/ets/utils/ApplyForUtil.ets

```

// 根据申请状态返回申请结果文字
export const applyForStatus = (status: number) => {
  switch (status) {
    case 1:
      return '待审批'
    case 2:
      return '正在审批中'
    case 3:
      return '审批通过'
    case 4:
      return '拒绝'
  }
}

// 根据申请状态返回对应的颜色值
export const applyForStatusColor = (status: number) => {
  switch (status) {
    case 1:
      return '#ff5f35'
    case 2:
      return '#53cbae'
    case 3:
      return '#53cbae'
    case 4:
      return '#ff5f35'
  }
}
}

```

6.2.6、办公模块中渲染申请项列表

mobile_officing/entry/src/main/ets/pages/work/work.ets

```

import { ApplyForItem } from '../../components/ApplyForItem'

@Component
export struct Work {
  @Builder buildApplyFor() {

```

```

Column() {
  Row() {
    Row() {
      Image($rawfile("work/badge.png"))
        .width(22)
        .height(22)
      Text("我的申请")
        .margin({ left: 5 })
        .fontSize(20)
        .fontWeight(600)
        .fontColor('#101010')
    }

    Row() {
      Text("更多")
        .fontColor('#7f6666')
        .fontSize(16)
      Image($rawfile("common/arrow_right.png"))
        .width(20)
        .height(20)
    }
    .onClick(() => {
      router.pushUrl({
        url: 'pages/Work/MyApplyFor/MyApplyFor'
      })
    })
  }
  .padding({ left: 10, right: 10 })
  .justifyContent(FlexAlign.SpaceBetween)
  .height(60)
  .width('100%')

  ForEach(this.processList, (process: Process) => {
    ApplyForItem({ process })
  })
}
.margin({
  top: -65,
  bottom: 15
})
.width('94%')
.backgroundColor(Color.white)
.borderRadius(10)
}

build() {
  Stack({ alignContent: Alignment.TopStart }) {
    // 构建头部
    this.buildTop()
    List() {
      // 提示信息
      this.buildTip()
      // 应用管理
      this.buildAppManagement()
      // 我的申请
      this.buildApplyFor()
    }
  }
}

```

```
    }  
    .alignListItem(ListItemAlign.Center)  
    .width('100%')  
    .height('100%')  
    .padding({  
      top: 100  
    })  
  }  
  .width('100%')  
  .height('100%')  
  .backgroundColor('#f5f5f5')  
}  
}
```

6.3、我的申请列表页面

6.3.1、跳转到我的申请列表页面

mobile_officing/entry/src/main/ets/pages/work/work.ets

```
@Component
export struct Work {
  @Builder buildApplyFor() {
    Column() {
      Row() {
        Row() {
          Image($rawfile("work/badge.png"))
            .width(22)
            .height(22)
          Text("我的申请")
            .margin({ left: 5 })
            .fontSize(20)
            .fontWeight(600)
            .fontColor('#101010')
        }

        Row() {
          Text("更多")
            .fontColor('#7f6666')
            .fontSize(16)
          Image($rawfile("common/arrow_right.png"))
            .width(20)
            .height(20)
        }
        .onClick(() => {
          router.pushUrl({
            url: 'pages/work/MyApplyFor/MyApplyFor'
          })
        })
      }
      .padding({ left: 10, right: 10 })
      .justifyContent(FlexAlign.SpaceBetween)
      .height(60)
      .width('100%')

      ForEach(this.processList, (process: Process) => {
        ApplyFormItem({ process })
      })
    }
    .margin({
      top: -65,
      bottom: 15
    })
    .width('94%')
    .backgroundColor(Color.white)
    .borderRadius(10)
  }
}
```

6.3.2、发请求获取数据

mobile_officing/entry/src/main/ets/pages/work/MyApplyFor/MyApplyFor.ets

```
import { Process } from '../../../types/Process'
import { getProcessList } from '../../../api/Process'

@Entry
@Component
struct MyApplyFor {
  @State currentIndex: number = 0
  @State page: number = 1
  @State type_id: number = 0
  @State processList: Process[] = [];

  async getProcessListData() {
    const res = await getProcessList({ type_id: this.type_id, page: this.page,
    pageSize: 10 })
    this.processList = res.data.items
  }

  aboutToAppear() {
    this.getProcessListData()
  }
}
```

:::tip

API 接口的封装在前面已经说了，这里直接调用接口获取数据即可

:::

6.3.3、申请列表渲染

mobile_officing/entry/src/main/ets/pages/work/MyApplyFor/MyApplyFor.ets

```
import { NavBar } from '../../../components/NavBar'
import { Process } from '../../../types/Process'
import { getProcessList } from '../../../api/Process'
import { ApplyForItem } from '../../../components/ApplyForItem'

@Entry
@Component
struct MyApplyFor {
  @State currentIndex: number = 0
  @State page: number = 1
  @State type_id: number = 0
  @State processList: Process[] = [];

  async getProcessListData() {
    const res = await getProcessList({ type_id: this.type_id, page: this.page,
    pageSize: 10 })
    this.processList = res.data.items
  }

  aboutToAppear() {
    this.getProcessListData()
  }
}
```

```

}

@Builder TabBuilder(index, tabTitle) {
  Column() {
    Text(tabTitle)
      .fontColor(this.currentIndex === index ? '#101010' : '#666666')
      .fontSize(this.currentIndex === index ? 18 : 17)
      .fontWeight(this.currentIndex === index ? 500 : 400)

    .margin({ top: 10, right: 5, bottom: 10 })
    Divider()
      .strokeWidth(2)
      .color('#0475fa')
      .opacity(this.currentIndex === index ? 1 : 0)
      .width('50%')
  }
  .width('100%')
  .height('100%')
  .backgroundColor(Color.white)
}

@Builder buildApplyForItem() {
  Column() {
    List() {
      ForEach(this.processList, (item: Process) => {
        ListItem() {
          ApplyForItem({process: item})
        }
      })
    }
    .backgroundColor(Color.white)
    .borderRadius(5)
  }
  .padding(15)
  .width('100%')
  .height('100%')
}

@Builder buildTopTab() {
  Tabs({ barPosition: BarPosition.Start }) {
    TabContent() {
      this.buildApplyForItem()
    }.tabBar(this.TabBuilder(0, '全部'))

    TabContent() {
      this.buildApplyForItem()
    }.tabBar(this.TabBuilder(1, '人事管理'))

    TabContent() {
      this.buildApplyForItem()
    }.tabBar(this.TabBuilder(2, '行政事务'))

    TabContent() {
      this.buildApplyForItem()
    }.tabBar(this.TabBuilder(3, '财务类'))
  }
}

```

```

        TabContent() {
            this.buildApplyForItem()
        }.tabBar(this.TabBuilder(4, '业务相关'))
    }
    .vertical(false)
    .barMode(BarMode.Fixed)
    .animationDuration(400)
    .onChange((index: number) => {
        this.currentIndex = index
        this.type_id = index
        this.getProcessListData()
    })
    .layoutWeight(1)
    .backgroundColor('#f5f5f5')

}

build() {
    Column() {
        // 标题
        NavBar({ title: '我的申请' })
        // 顶部Tab
        this.buildTopTab()
    }
    .width('100%')
    .height('100%')
}
}

```

6.5.2、新增请假申请

api 接口

```
import { request } from '../utils/Request'
import http from '@ohos.net.http'

// 新增请假申请
export const addProcess = (extraData: Object) => {
  return request({
    url: 'process/add',
    method: http.RequestMethod.POST,
    extraData
  })
}
```

页面代码实现

mobile_officing/entry/src/main/ets/pages/work/LeaveApplication/LeaveApplication.ets

```
import { NavBar } from '../../../components/NavBar'
import promptAction from '@ohos.promptAction'
import router from '@ohos.router'
import { addProcess } from '../../../api/Process'

@Entry
@Component
struct LeaveApplication {
  private types = [
    { value: '年假' },
    { value: '事假' },
    { value: '病假' },
    { value: '调休' },
    { value: '婚假' },
    { value: '其他' }
  ]
  private type: string = ''
  private reason: string = ''

  // 提交
  async submit() {
    if (this.type === '') {
      promptAction.showToast({
        message: "请假类型不能为空",
        duration: 800,
        bottom: 400
      })
      return
    }

  }

  build() {
    Column() {
      // 导航栏
      NavBar({ title: "考勤打卡" })

      Column() {
        // 渲染头部
        this.buildHeader()

        // 渲染内容
        this.buildContent()
      }
      .padding(15)
    }
    .backgroundColor('#f5f5f5')
    .width('100%')
    .height('100%')
  }
}

```

6.6.2、考勤打卡功能实现

6.7、工资列表&详情

6.7.1、工资列表渲染

实现效果

api 接口

mobile_officing/entry/src/main/ets/api/Salary.ets

```

import { request } from '../utils/Request'
import { salary } from '../types/Salary'

// 分页获取工资列表
export const getSalaryList = (extraData: {
  page: number
  pageSize: number
}) => {
  return request<{
    total: number
    items: Salary[]
 }>({
    url: 'salary/list',
    extraData
  })
}

```

工资列表页面渲染

mobile_officing/entry/src/main/ets/pages/work/SalaryList/SalaryList.ets

```

import { NavBar } from '../../../components/NavBar'
import { salary } from '../../../types/Salary'
import { getSalaryList } from '../../../api/Salary'
import router from '@ohos.router'

@Entry
@Component
struct SalaryList {
  @State page: number = 1
  @State salaryList: Salary[] = []

  async getSalaryList() {
    const res = await getSalaryList({ page: this.page, pageSize: 10 })
    this.salaryList = res.data.items
  }

  onPageShow() {
    this.getSalaryList()
  }

  @Builder buildSalaryItem(salary: Salary) {
    Row() {
      Image($rawfile("salary/salary.png"))
        .width(30)
        .height(30)
      Column() {
        Text(`${salary.month}月份工资单`)
          .fontSize(16)
          .fontColor('#101010')
          .fontWeight(Fontweight.Bold)
        Text(`${salary.created_at}`)
          .fontSize(14)
          .fontColor('#999999')
      }
    }
  }
}

```

```

        .height('60%')
        .justifyContent(FlexAlign.SpaceAround)
        .layoutWeight(1)

        Text(`${salary.net_salary}`)
            .fontSize(26)
            .fontColor('#4749a1')
            .fontWeight(FontWeight.Bold)
            .width(60)
            .margin({
                right: 10
            })
        Image($rawfile("common/arrow_right.png"))
            .width(20)
            .height(20)
            .fillColor(Color.Red)
    }
    .backgroundColor(Color.white)
    .padding({
        left: 15,
        right: 15
    })
    .width('100%')
    .height(100)
    .onClick(() => {
        router.pushUrl({
            url: 'pages/Work/SalaryDetail/SalaryDetail',
            params: {
                id: salary._id
            }
        })
    })
}

build() {
    Column() {
        NavBar({ title: "工资单" })

    right: 15
})
}
}
.width('100%')
.height('100%')
.backgroundColor('#f5f5f5')
}
}

```

6.7.2、工资详情渲染

实现效果

api 接口

mobile_officing/entry/src/main/ets/api/Salary.ets

```
import { request } from '../utils/Request'
import { salary } from '../types/Salary'

// 获取工资详情
export const getSalaryInfo = (id: string) => {
  return request<Salary>({
    url: `salary/info?id=${id}`
  })
}
```

工资详情页面渲染

mobile_officing/entry/src/main/ets/pages/work/SalaryDetail/SalaryDetail.ets

```
import router from '@ohos.router'
import { salary } from '../../../types/Salary'
import { getSalaryInfo } from '../../../api/Salary'
import { NavBar } from '../../../components/NavBar'

@Entry
@Component
struct SalaryDetail {
